

Deliver the right message

Mailstream Evolution™ Inserting System

Built for privacy

If your mailroom is responsible for processing sensitive customer information, there is absolutely no room for errors. You must know the exact contents—including every single page of every mailpiece.

With the Pitney Bowes Mailstream Evolution™ Inserting System you can take advantage of the system's consistency, predictability and ability to track the complete contents of each mailpiece, from start to finish. The Mailstream Evolution Inserter is the next generation of the world's best selling FPS™ Split Drive Inserter with over 1,500 installations in the past five years. It includes newly integrated features, such as our exclusive Privacy Guard™ module, for an added level of privacy.

Privacy that doesn't cut corners

The Mailstream Evolution inserter offers a combination of hardware and software features to help mailers know the exact contents of each mailpiece. It is built on our world-class Direct Connect inserter technology, providing optimum control with virtually any existing code technology. Envelope finishing and our unique Privacy Guard module mean you can provide the private, closed-faced envelopes that your customers demand.

Process letters and flats

Process letters and flats on a single system that does it all! The base system runs #10 and 6x9 letters. Additionally it can be enabled to run flat mail with a field upgrade.

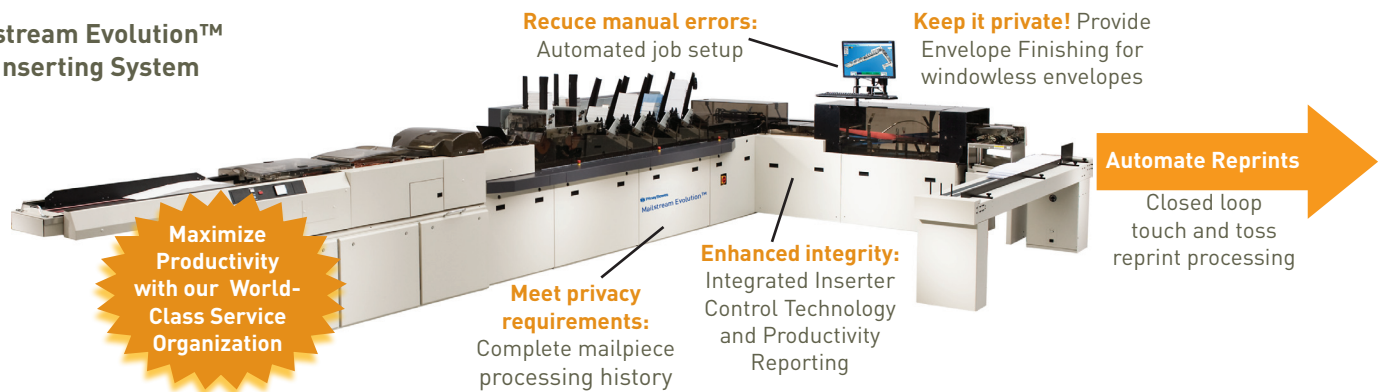

Dependable results, every shift

Engineered for consistent high performance operation, the Mailstream Evolution Inserting System's motion control system controls, detects, corrects, slows down and/or accelerates variable thickness materials to achieve the best possible throughput. This superior paper handling helps increase uptime and substantially extends the intervals between regularly scheduled preventative maintenance.

Recommended Base Configuration (Built for Privacy)

Component	Pitney Bowes Solution	
Inserters Chassis	Mailstream Evolution™ 12K Inserting System	Process letters at speeds up to 12K per hour
Inserters Control Technology	Direct Connect Verify	Identify and track every page of every mailpiece, verify via file-based processing and input scanning
Input	Integrated Advanced Productivity Inputs (API)	Support cutsheet or continuous applications while processing up to 7 page tri-fold or 10 page half fold collations (20-lb paper)
Insert Feeders	Friction insert feeders with gap separation and roller-based feeding	Insert CDs, Z-folded, stiff booklets, open ended leading inserters, credit cards and more
Stacker	Flat belt Stacker	Integrated, consistent envelope stacking for letters and flats
Automated Job Setup	DFWorks® Mailrun Management	Simplify inserter setup and confirm that proper inputs are utilized
Reporting	DFWorks® Document Lifecycle Tracking	Detailed individual mailpiece processing history and reporting searchable by recipient information
Privacy	Envelope Finishing System	Print addresses or marketing messages on secure, closed-faced envelopes
	Privacy Guard™ and/or output scanning	Complete a final, inline check on each mailpiece after the insertion process
Flexible Service Options	ServiceWorks™ Solutions	Choose from a variety of flexible service options, including on-site service, on-call service and packages such as blocks of service hours or technical training

Mailstream Evolution™ 12K Inserting System

Additional Options to Meet Specific Requirements

Challenge	Pitney Bowes Solution	
High Page Count Letter Applications	High Productivity Input with Heavy Duty Folder	Process up to 9 page tri-fold or 16 page half fold collations (20-lb paper)
Automated Reprint	Direct Connect Automated Reprints with DC Verify	Completely automate and track your touch and toss reprint process
	Pitney Bowes® Companion™ Inserting System	Dedicated reprint and small job inserter
High Integrity Requirements	2D barcode input scanning	Utilize high integrity 2D barcodes for more accurate scanning
Specialized Inserts	Rotary Insert Feeders	Insert single panel glossy, stitched or glued booklets, multiple coupons, chromate sheet, onion skin paper and more
Personalized Inserts	Insert Feeder Scanning	Merge personalized inserts, such as health care cards, with high integrity
Stringent SLAs	DFWorks® Production Workflow	Real-time job tracking and SLA monitoring
	DFWorks® Productivity Reports	Advanced productivity reporting, including multi-site reports and advanced analytics
Meters	DFWorks® Postage Accounting	Automated postage funds management and usage reporting
